

Dear aHUS Community:

In recognition of aHUS Awareness Day 2019, Alexion is pleased to be joining your efforts to support aHUS patients around the world by hosting a blood donor drive and organ donor registration at our corporate headquarters in Boston, MA and our New Haven, CT offices with our One Source team.

As a company focused on discovering and delivering transformative medicines, technologies and patient-support services to people living with rare diseases, it is our responsibility to listen to and understand the needs of patients and caregivers. We have heard your call to action and want to express our continued commitment to the aHUS community and support of your aHUS awareness day blood drive initiative.

We also want to recognize the resiliency of people living with aHUS and the support provided by caregivers and patient organizations like the aHUS Alliance.

Sincerely,

Alexion Patient Advocacy
