

September 24, 2020

**Dear aHUS Community,**

On aHUS Awareness Day 2020, Alexion joins you in recognizing the spirit and resiliency of those living with atypical hemolytic uremic syndrome (aHUS) and the caregivers who contribute to their wellness and wellbeing every day. We also celebrate the patient organizations that provide continuous support and important disease education to this community.

People living with rare diseases and devastating conditions are our inspiration and our Guiding Star. We are committed to listening to, understanding and working to improve the lives of people living with aHUS through our focus on treatment innovation. Through our trusted partnership with you, we deepen our understanding of what it's like to live with aHUS and identify areas of unmet need so we can continue to help patients and families fully live their best lives.

In recognition of this important global aHUS Awareness day, we have invited two patients living with aHUS to individually share their stories with our colleagues around the world via webinars. In the spirit of this year's theme for aHUS Awareness Day, we look forward to hearing their perspectives on what they consider to be the "key" to maintaining Wellness and Wellbeing while living with a rare disease. We are truly inspired by the patients we serve and appreciate learning more about their journeys.

We look forward to our continued partnership and remain committed to supporting the aHUS community.

Sincerely,

Wendy Erler  
Head of Patient Experience and Insights
